Art Unit: 2736

1. This application is objected to under 37 CFR 1.172(a) as the assignee has not established its ownership interest in the patent for which reissue is being requested. An assignee must establish its ownership interest in order to support the consent to a reissue application required by 37 CFR 1.172(a). The assignee's ownership interest is established by:
 - (a) filing in the reissue application evidence of a chain of title from the original owner to the assignee, or
 - (b) specifying in the record of the reissue application where such evidence is recorded in the Office (e.g., reel and frame number, etc.).

The submission with respect to (a) and (b) to establish ownership must be signed by a party authorized to act on behalf of the assignee. See MPEP § 1410.01.

An appropriate paper satisfying the requirements of 37 CFR 3.73 must be submitted in reply to this Office action.

2. The reissue oath/declaration filed with this application is defective because it fails to identify at least one error which is relied upon to support the reissue application. See 37 CFR 1.175(a)(1) and MPEP § 1414.

Art Unit: 2736

3. Claims 1-⁷~~6~~ are rejected as being based upon a defective reissue declaration under 35 U.S.C. 251 as set forth above. See 37 CFR 1.175.

The nature of the defect(s) in the declaration is set forth in the discussion above in this Office action.

4. Claim 5 is rejected under 35 U.S.C. 251 as being an improper recapture of claimed subject matter deliberately canceled in the application for the patent upon which the present reissue is based. As stated in *Ball Corp. v. United States*, 221 USPQ 289, 295 (Fed. Cir. 1984):

“The recapture rule bars the patentee from acquiring, through reissue, claims that are of the same or broader scope than those claims that were canceled from the original application.”

Claim 5 corresponds to claims 1-13 of application S.N. 08/355,041. All of the afore-mentioned claims of application S.N. 08/355,041 were rejected under 35 U.S.C. 102 or 35 U.S.C. 103 and subsequently were deliberately canceled in favor of a claim reciting a combination of encoding and *FM modulation* and relying on this combination of features for patentability, the limitation that the modulation is FM being deleted in claim 5.
